Don't be human, be supra-Human

Maitreya Rael - Raelian Gathering, October 15, 78 aH (2023), Okinawa, Japan

You know that in Israel - to be more accurate, in Palestine, because there is no Israel but there is Palestine – they started a war. The elected government of Palestine, which is Hamas, attacked Israel, this artificial state. You should always remember that it is Palestine. It was under British occupation, and because the British felt guilty after the Nazism era, they gave the territory for a new state created from nothing that they called: Israel.

In this country, Christians, Jews and Muslim people have been living peacefully together for a long time, for centuries. The British, the colonial power who owned the territory of Palestine, gave a part of it to create a Jewish state, which is against the Jewish religion. The Bible clearly says to Jewish people, "It's forbidden for you to have a state. Go around the world, be among the nations, but never create your own state." Clear and simple! And when the artificial Jewish state was created

by the British, the majority of the Jewish people living in Palestine were against it, because they didn't want to steal the land and the houses of the Palestinians, because they follow the orders of the Elohim: "You should not kill. You must not steal what belongs to other people." That's clearly in the Bible! So, the majority of the Jewish people living in Palestine were strongly opposed to the creation of Israel. They are Jewish, but they respect their religion. But the Zionists, financed by the Rothschilds, created a state and they dared to say, "A land with no people for people without a land". Like if there was nobody living in Palestine at the time. That's what they pretended. But there were millions of people, there was money, airline companies, all of them Palestinian. But suddenly, they pretended, "There are no people!" And those who survived Nazism said, "We are a people without a land, so let's take this land where there is nobody." Nobody? There were millions of Palestinians! Then the Jews arrived and the Palestinians, with a very friendly attitude, welcomed everybody, they gave food, they gave a place to stay to these poor people who survived the Nazi concentration camps. But the Rothschilds wanted to create a strong military state and sent a lot of weapons.

And that's what happened. The Palestinians call it "Nakba", when the Jewish people, not really Jewish, came from Europe... The Palestinians are more Jewish than the Zionists.

Many years ago, I requested a genetic test on the whole population of Israel, because real Jewish people, as they are direct descendants from the Elohim, have a special marker in their DNA; that is easy to check. They refused of course! Because, it would prove that 70% of the Israelis are not Jewish. And that brings us to October 7th!

October 7th is an important date for us, and it is on October 7th that the Palestinians attacked Israel. And now it's a big problem. It happened on October 7th when we were together. It could have been October 5th, October 10th... No, October 7th! How lucky we are. Only we know the meaning of October 7th. Thank you, Elohim!

We are living the most exciting time of humanity's history. Everybody thinks how terrible was the genocide of the Jewish people by the Nazis, the suffering of the Jewish people during the holocaust; which was not a holocaust, it was a Shoah, but not a holocaust. Holocaust means: a sacrifice given to God or the Elohim. You take a lamb, or a sheep, and you kill it as a sacrifice to God. You take a sheep, you put it on a table, and you kill it. That's a holocaust. But the Jewish people didn't want to be killed. So, you cannot call that a holocaust. Holocaust would mean: "We come and please kill us for God." It was a genocide, but not a holocaust, because nobody wanted to die. And the Nazis were killing the Jewish people. And now in Palestine, the Jewish people, whose ancestors suffered in the past from Nazism, are almost all dead. Yesterday, the Israeli government asked the whole population of Gaza to leave. That's new. That's happening now! It's called ethnic cleansing: "Palestinians, we will destroy the cities, we will bomb. So, leave!" That's happening now. So, some Palestinians listened, took their cars and buses, and left. Israel bombed them, killing hundreds of them, because they were leaving. They were leaving following the orders of Israel. So, they don't want them to leave, they want to kill everybody! That's happening now.

We have to send a lot of love to the poor Palestinian people, because soon, there may be millions of Palestinians killed. And nobody moves. Nobody moves, politically correct person thinks of the victims of terrorism. The real victims are the Palestinians.

What is the population of Gaza? I explained it earlier. The Jewish people, financed by the Rothschilds, took the houses and the land of the Palestinians in 1948, performing what is called “Nakba”, which means in Arabic: catastrophe, some terrible event. And the people escaped the weapons of the Jewish people, they became “refugees” and went to Gaza! The majority of the people living in Gaza are refugees escaping from the persecutions of the Israeli army. And that’s the same people they want to kill again. This is unthinkable. These people lost their houses, their land, they lost everything. They live in the city of Gaza, very small, thirty kilometers long, a tiny city. And Israel is bombing them, destroying everything, cutting off electricity, no water, no food. They want everybody to die. This is happening now, and nobody moves!

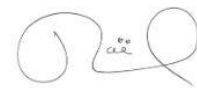

The difference with what happened at the same time of Nazism is that, after, everybody said, “Oh, we didn’t know!” How could six million Jewish die and people say, “We didn’t know”? But for the Palestinian people in Gaza everybody knows. When that will be finished, after millions of people are killed, nobody will be able to say, “We didn’t know!” This crime against humanity will be on everybody’s conscience, because everybody knows, and nobody is moving! Every large international media says, “Israel has the right to defend itself.” There is international law. International law is very precise, and says, “Yes, each country has the right to defend itself, but people living under occupation have the right to fight for their freedom.” They are not terrorists; they are fighting for their freedom. This is authorized by the international law as well. Everybody calls the French people who were fighting the Germans: freedom fighters, because all of France was occupied by the German army. Some courageous French people became “freedom fighters” for attacking the Germans. They are now considered “heroes”. But the Palestinians are seen as terrorists. That’s what the German press was calling the French people fighting them. There were no freedom fighters in France for the Germans, only terrorists. So, you see the double standard? For the occupation power, you are terrorists; for the people fighting for their freedom, you are freedom fighters. Terrorists and freedom fighters are the same people; it’s just a different name. But the truth is: there are international laws allowing you to fight when your country is occupied! But nobody cares.

And right now, while we are peacefully talking together, thousands of Palestinians are killed. This is what being “human” is. That’s why I repeat, “I don’t want to be human!” Don’t be human. Human is Hiroshima. The President of the United States pretended, “Hiroshima saved the lives of a lot of people.” Wow! It’s too bad they don’t matter for those who died under the Hiroshima atomic bomb. “Thanks to the Hiroshima bomb, the war stopped quickly!” In psychiatric hospitals, it’s called: mental confusion. Mental confusion! “It was necessary to kill hundreds of thousands of people in Hiroshima”, that’s what they pretended. And they never apologized. Until now, every President of the United States have gone to Hiroshima to participate in ceremonies in memory of the victims, but they never apologized, “It was necessary.” We are living in a psychiatric hospital!

I cry every day, because my mission is to save humanity. Sometimes I wonder, “Do they deserve to be saved?” I feel very close to Satan, more and more. Satan thinks that Humanity is a mistake. More and more, I think that he may be right; maybe we are a mistake - except the Raelians - when we see what’s happening in the world, in Ukraine, in Pakistan, now in Palestine, and in so many other places. People have only one idea: to kill each other and to kill as many as possible.

Do not kill, love your neighbor as yourself" – these are the basic teachings of the Elohim, the fundamental lessons given by their prophets to the two groups of people who are killing each other in the Middle East. How can they disregard their basic commandments?

Where are we? We don't belong on this planet! My dream is that the Elohim come and bring us all far away from humanity. But yes, if we work together with our meditation for peace, there is still hope. But what a planet! People who were decimated in concentration camps, fifty years later, do the same to the Palestinians. You would expect from people having suffered from Nazism that they would spread peace and love everywhere, not creating another genocide! That's what's happening. So, I cannot stop crying.

Thank you, Elohim, for giving us hope. We need to work together to save humanity from itself. Because the most dangerous thing for humanity is humanity itself.

No, we don't have predators; there are no more T. rex, no lions attacking us. Humans! Let's hope we succeed in saving humanity from humanity. And for that, we have to use supraconsciousness. And when we use supraconsciousness, we are supra-human. Don't be human, be supra-human!

Do not kill; love your neighbor as yourself

Maitreya Rael - Raelian Gathering, October 29, 78 aH (2023), Okinawa, Japan

If somebody in your family is very sick, you can bring this person to church or to a hospital. What's better? Of course, hospital is better! So many people who are very sick, almost dead, go to a hospital and doctors, using a very advanced technology, save their life. They are in bed with tubes everywhere, and then wake-up and say, "Thanks God for saving my life!" If they were intelligent, doctors should unplug everything and say, "Thanks God? All right, I remove every lifesaving tube then." I would do it if I were a doctor! If you thank God, I remove all life sustaining equipment.

We must trust science and consciousness to save humanity. Humanity is in a very, very, very dangerous situation! We can bring humanity to church, but it is better to bring it to a hospital, and the hospital is what you do spreading the Message.

One of the most dangerous places on Earth is Palestine. What is the problem? Two groups of people, who both believe in God, kill each other. They can destroy the whole humanity in the name of God. This is totally crazy. We are living this now. Israel has a plan to destroy all humanity with atomic bombs. They say, "If you destroy Israel, we will destroy all humanity." They said that. They say it. The government of Israel says, "If Israel is in a situation of being destroyed, we have two hundred atomic bombs that will be launched on every capital." These are people who are supposed to follow the Elohim's teaching. The main teaching of the Elohim is: "Do not kill." It's very simple! There is a beautiful image, on Facebook, of a UFO. Two Elohim inside are talking to each other and, in the background, you see the Earth with an incredible number of atomic bombs exploding. And one of the Elohim says to the other, "What was difficult for them to understand?" Was it difficult to understand: do not kill?" Because the most important teaching of the Elohim is: do not kill. That's the essence of the Elohim's teaching: do not kill. I don't think it's difficult to understand: do not kill. There is no need to go to university or to high school to understand: do not kill. The number two teaching of the Elohim: love your neighbor as yourself. Love your neighbor as yourself!

"Do not kill; love your neighbor as yourself."

Can we have a simpler message? It's not complicated as the teaching of the Catholic Church is, or as the Jewish schools that say, "Do not eat pork, do not eat shrimps." This is nothing, and they study it every day.

"Do not kill" is more important than, "Do not eat pork"!

If humanity simply listens to the Message of the Elohim, there is no risk of disappearing.

But it doesn't, and we are at this turning point. If everything explodes, we will see many people praying, saying, "Thank you God for saving humanity." Boom! Boom! Boom! It just happens. You are walking in the streets of Hiroshima with your friends, going to a Catholic church, or to a Buddhist temple with your wife and children, full of hope in God, and... Boom! No prayer can change anything, sorry!

We can avoid this destruction with two rules: do not kill; love your neighbor. That's the message of the Elohim. It was the message at the time of Moses, the message at the time of Jesus, the same message at the time of Maitreya Rael. We don't change anything: do not kill; love your neighbor. A lot of work, right?

Every day, one hundred new atomic bombs are made, by people who go to church or temples, but they make it.

That's this planet! Hope is good, but it's too early for celebration.

Let's hope; let's keep meditating for peace. What are we doing when we meditate one minute for peace? We send brain waves that can change the behavior of politicians and military. So, we are in action to save humanity. Your little brain, your brain waves, can save humanity. That's your power! When a certain number of millions of people think the same thing, it affects all of humanity. We don't celebrate; we try to push for saving humanity. But we can celebrate the fact that thousands of Raelians are doing it; and more importantly, also non-Raelians.

Raelians are a small minority, but the “One Minute for Peace” meditation is made by millions of people. They are not Raelians, we don’t care, they push in the same direction: no more war, no more atomic bombs, peace and love on Earth. “Do not kill; love your neighbor”, have that in your heart. Thank you, Elohim, for telling us, “Do not kill; love your neighbor.”

Do you love your neighbor? It’s very important!

Love your neighbor! You think about foreign countries. No, no, no! I always ask myself, “Do I give enough love to this friend? Do I give enough love to that friend?” We all need to have this in mind.

We are together and you may think, “I want to give to Palestinians.” Yes, but is there one Raelian who is a little bit depressed? A little bit sad? Who lost his girlfriend or boyfriend? Or their job? Do we support each other enough? “Love your neighbor” is to say, “Are you okay?”

Invite each other to a restaurant; give love to the immediate people beside you. That’s it!

Hold each other’s hands. Feel this wonderful family we are. I know that some of you are living conflicts. Do you want to bring peace on Earth? If you are fighting with the Raelians sitting beside you, how can you bring peace on Earth? Start with yourselves; give love, here and now. I hope nobody will leave this room without saying to other people, individually, looking in the eyes, “I love you”, feeling it! That’s how we will save this planet.

Thank you, Elohim, I love you!

The Mashiach Rael proposes a peace plan for Middle East: Letter to the Israeli's Ambassador

Maitreya Rael — October 10, 78 aH (2023), Okinawa, Japan

Dear Ambassador,

Imagine that in 1948, the Jews who survived the terrible genocide perpetrated by the Nazis hadn't created the separate nation of Israel but had instead simply gone to Palestine to settle peacefully among the local population. What a different world we would have today!

At the time, the entire world was very sympathetic to and full of compassion for the Jewish people because of what they had endured. The world was, in fact, "pro-Semitic" then, including the Arabic people, who are the Jews' direct brothers since both groups are Semitic peoples. (See <http://en.wikipedia.org/wiki/Semitic>). Knowing this, we can understand that no Arab could possibly be anti-Semitic, despite the much-propagated media lie to the contrary.

Beyond doubt, before the creation of Israel, the Palestinian people would have been ready to welcome all the Jewish survivors to their country, where Jews already made-up three percent of the population and had lived happily among the Arabic people for centuries. This Jewish minority was highly respected and was perfectly integrated into the Muslim society.

What happened after World War II was both tragic and unnecessary. At first, many Jews emigrated there peacefully from Europe. Then some fanatical Zionists initiated the creation of a purely Jewish state that stole land and houses from the Arabic people, forcing more than a million of them into exile in a monstrous ethnic cleansing episode.

Imagine that this terrible crime had never been committed. The Palestinians would have welcomed Jews from around the world, since Muslims have great respect for Jews, described in the Koran as People of the Book (referring to the Bible). The Shoa [Holocaust] survivors would have brought with them to Palestine their enormous scientific and intellectual knowledge, and today we would have a rich country called Palestine that would be approximately thirty percent Jewish.

Those Jews would now form part of a democratically elected government, and there would be no war there, nor any refugees – and no concentration camps like Gaza. September 11 wouldn't have happened and we'd have no "war against terror". Just imagine...

Then consider the reality: Israel today is very similar to – yet even worse than – the South Africa of the apartheid era. It's a racist state that accepts only Jewish immigrants, denies equal rights to non-Jews living there and forbids members of other religions to attempt the conversion of its Jews. Its fanatical orthodox Jews even consider all non-Jews to be inferior human beings called "gentiles", who, according to the orthodox religious books, are just good enough to be slaves.

Following the great example set by Mahatma Gandhi, I recently launched an initiative called: "Be a Jewish Gandhi", which promotes the adoption of Palestinian orphans by Israeli couples who would agree to raise the adopted children

as Muslims. But it looks as though Israeli law makes it illegal for Jews to adopt non-Jewish children! Can we imagine anything more racist?

It's not too late to create peace between these Semitic brothers, but every new war crime like the Gaza massacre makes it more difficult. The solution is very simple: as usual, only love – not war – can save humanity. A two-state solution is not the solution, for it's perpetuating a terrible apartheid. Those who lost their land, homes and children will never be able to forgive and live side by side with their tormentors.

The hatred in this region will never end unless something drastic happens, since the only solution would be something that creates a truly deep and sincere reconciliation. Such reconciliation can only be accomplished if the victims are

first recognized as victims, then integrated into a new entity – and with huge monetary compensation for their suffering. This means the creation of a unique, new state of Palestine, in which, as in South Africa, two groups of people – in this case, Palestinians and Jews – could live peacefully side by side and share their combined financial and human resources. This huge new Palestinian nation could become very rich, since so much money is now wasted on non-productive military expenditures.

Of course, creating this new nation would involve giving back to the Palestinians every parcel of land and every house that has been stolen from them – or the equivalent in monetary compensation if that property has been destroyed – plus additional financial compensation for each person killed and for the years of exile. And, of course, a guarantee that every exiled Palestinian can return home safely is needed.

Then, surely, the Semitic Palestinians would forgive their Jewish brothers and live peacefully with them forever. There is more than enough land in Palestine to create room for everybody, but only forgiveness and compassion can make it possible.

The Israelis are refusing to allow Palestinian refugees to return mainly because they are afraid of becoming a minority. But only those who don't trust the majority are afraid of being a minority, as the pro-apartheid white supremacists were in South Africa for so long. Today's South Africa is the proof that peaceful coexistence works. The national reconciliation in that country, wrought by great human beings like Nelson Mandela, was a success. Just as whites in South Africa no longer feel threatened to live among a black majority, there is no reason for Jews to fear living among an Arabic majority in a peaceful country where everyone would enjoy the same equal rights. After all, that would be a much less dangerous situation than being surrounded by hundreds of millions of hostile Arabic people!

The international community, the United Nations and all superpowers, should force Israel to accept this solution – if necessary, by putting in place, as they did for South Africa, a total economic embargo against Israel until the solution is accepted. They should also send troops to protect the defenseless Palestinian people in the Gaza concentration camp, who are in danger of being exterminated in a genocide that will forever make the Israelis look as bad as the Nazis. This genocide will trigger a worldwide wave of what is called “anti-Semitism”, but which will in fact be hatred directed against Jewish people.

The Israeli Law of Return, if applied equally to Palestinians and Jews worldwide, would permit the creation of a very rich country. It would also solve the problem of the hundreds of thousands of Jewish settlers who built houses in the Palestinian territories, since they would be able to stay where they are. The returning Palestinians could go back to their homes and lands in Israel. And Jerusalem would be the capital that both Palestinians and Jews cherish.

So, it's not too late to implement this fundamental change – the creation of a new Palestinian state in which all Semitic brothers and sisters can live together peacefully, without drama, bombs, genocide or orphans. Just imagine, as John Lennon sang so beautifully, “You may say I'm a dreamer, but I'm not the only one.”

Let's make the dream of a united Palestine a reality before it's too late! It's the only solution.

The Eye of Cain

Maitreya Rael — November 7, 78 aH (2023), Okinawa, Japan

The Israelis are the unhappiest people in the world, and that's why they are the most violent. They are intrinsically unhappy because they know deep down within themselves, despite the lies of their politicians and media, that they have stolen the lands and homes of the Palestinians, which goes against the very foundations of their religion, whose most beautiful values are: "Thou shalt not kill," and "Love thy neighbour as thyself."

With everything that is happening in the world, some Raelians wonder if they have the moral right to participate in a Happiness Academy. Spreading happiness when atomic bombs are multiplying every day and Palestinian children are being massacred in a terrible genocide seems shocking to them.

The truth is that the only way to save humanity is through Love. Love is only possible among happy people who spread happiness. When people are unhappy, they can become aggressive, and from aggressiveness, it's just a step to

violence. The destruction of humanity can only be caused by unhappy people, just like the Palestinian genocide. Every violent action also increases the guilt of those responsible and, therefore, their lack of happiness, in a vicious circle where each violent action generates more unhappiness and thus more violence.

The Israelis are the unhappiest people in the world, and that's why they are the most violent. They are inherently unhappy because they know deep down, despite the lies of their politicians and media, that they have stolen the land and homes of the Palestinians, which goes against the very foundations of their religion, whose most beautiful values are: "Thou shalt not kill", and "Love thy neighbor as thyself"; a religion that teaches them that they are the "chosen people", but chosen not to dominate others but to promote worldwide the absolute value of not killing and spreading love; with a law that eliminates any temptation of domination, perhaps the most beautiful law of Hebrew texts: they are prohibited from creating a state or a nation! Therefore, Zionism is fundamentally anti-Semitic and anti-Jewish.

This lack of happiness due to the guilt of committing genocide and pillaging can be found in all "civilizations" that have built their power and wealth on the domination and suffering of "others". This was the case for almost all European nations in their colonial madness, which Asians rightly call the "white catastrophe"; North and South America with the genocide of local populations, Asia still bearing the scars of these crimes, Australia, etc. In short, the whole planet has been ravaged by this sense of racial superiority of European whites and their impunity in what Americans call exceptionalism. This means, in essence, that International Law must apply to all but not to them. The same suffering that Israelis endure due to their crimes drives them to unhappiness and ever-increasing violence, and it was experienced by colonialists in Africa, America, and all over the world, pushing them into this vicious circle inevitably leading to genocide.

And everywhere, the justification of racial superiority is inevitable. In the context of a new world war that can only be nuclear, there is no doubt that all parties will justify their missile launches with racial superiority. It is precisely this idea of racial superiority that can lead to the destruction of humanity.

The only solution to save humanity is, therefore, love. And this love can only be unconditional, like all true love. And it can only be generated by happiness, which, in a positive vicious circle, automatically brings more happiness and therefore more love.

That's why when atomic bombs and genocide accumulate, it is more important than ever to meditate for peace and to participate in the Happiness Academies. Only the spread of happiness and love can save humanity!

The mistake would be to falsely justify staying at home to mourn the world's tragedies, which would not prevent them from trying to make those who participate in the Happiness Academies feel guilty, claiming that it would be selfish to focus on happiness when so many people are suffering. It is precisely to stop this suffering that we MUST spread and develop happiness. Happiness is the only solution to save humanity; because it brings Love.

This is also why we must stop indulging in images of bloody children and spread more beauty, art, and happiness.

Covid vaccine: “It’s not too late to save some people”

Maitreya Rael – September 14, 78 aH (2023), Okinawa, Japan

There are some Level 5s who have chosen to be vaccinated and who are presently very ill; it is important to be informed of this so as to avoid this vaccine.

From the start, I have been warning Raelians to avoid the Covid vaccine, which is dangerous. I know that some Guides and doctors have said that my comments were “just an opinion”, when in fact these “opinions” are teachings from above. Insinuating that this is just an “opinion” shows the same attitude as those who followed Lise Lippé and Victor L., or more recently Daniel C., when I made an update concerning the non-proliferation of nuclear weapons, claiming that nothing in the Messages should be modified, not even by the Elohim.

This also resembles the words of the rabbi who told me that between the words of the Elohim and the Bible, he would choose to follow the Bible... If there is a living Prophet, it is precisely to be able to adjust the Messages depending on our scientific or political evolution.

Those who say that my comments are “just an opinion” ought to be brought before a Council of Discipline or even Wise Council. And that includes doctors. I understand that many members of the Structure, especially in Europe, have had themselves injected by this poison following the example of some doctors. If this provokes health problems, or if they die, they bear some responsibility, and they should not retain their status of Guide.

This injection of the messenger RNA vaccine against Covid clearly displays its function by indicating that it modifies the RNA pool. Any modification of the RNA pool will automatically modify the DNA, hence the Elohim’s creation, which is a supreme lack of respect for our Creators. If everyone had refused this, the Raelians would even more become models for Humanity. The Elohim gave us a perfect immune system and any “therapy” claiming to improve it is an insult to our Creators. It is not too late to save some people.
