## A HAPPY CELEBRATION IN THE VALAIS MOUNTAINS FOR THE 30TH ANNIVERSARY OF THE SECOND ENCOUNTER...

The 6th International Raelian Convention just finished.... The love that emanated from the Convention Hall in the Siere Valley during these 4 unaccountable days is still bouncing on the Vallis mountains. We laughed, we cried from beautiful emotions, we discovered each other more, 8 new members joined us doing their cellular plan transmission... and in everyone of us there was that silent promise to the Elohim to help the last Prophet, the Maitreya RAEL, more and better for the few years left... Our Beloved Prophet gave us so much.

Here are a few excerpts of his speeches taken from notes.

### THE ELOHIMIZATION YEAR

I announced the Elohimization year at our last Convention and I have been a Prophet?.

Exceptional events have happened this year! To create life is the privilege of the Elohim. They arrived on earth and used the elements found here, the ones of the Mendeleiev table and those that are not known yet?. To create life like the Elohim did is to take chemicals and make them alive. This is what Craig Venter, an American scientist has started this year as he

wants to create a living unicellular entity using only chemicals. To create life with non-living matter, this is more exciting than cloning! It is the perfect illustration of the year of Elohimization.

The internet becoming more and more the nervous system of the planet is another illustration as well as the increase in space exploration and the plans to implant life on other planets.

### THE YEAR OF THE PROTECTION OF THE ELOHIM'S CREATION

Until now, we haven't been concerned much by pollution, but it is becoming necessary,

this is why I declare this year the “Year of the Protection of the Elohim’s Creation”. We won’t need to do it for long but it is urgent to do it now. There is a threat of seeing the Creation of the Elohim destroyed without the possibility to recreate it as all DNA haven’t been preserved yet.

To go back to the horse’s age as some stupid and stubborn environmentalists suggest would lead to 1m50 of horse shit in the streets of Paris per day for example. New technologies are the solution as I outlined it with the nanotechnology already 6 years ago in “Yes To Human Cloning”. Instead of trying to go back to the past, we need to use the new technologies like the Hydrogen cars. These cars will just release Oxygen and Water. You will be able to go to cities to get fresh air!

Hydrogen is the energy source used on the planet of the Elohim, but not the Hydrogen as we have it here, it is solid Hydrogen. It will come here soon.

I love the local vineyards here, they look like Zen gardens, so beautiful. However they pollute with the chemicals used. Even biological cultures pollute more than Genetically

Rael giving a speech to some 200 attendees at the Vineyard.

modified cultures. This is why we need to act to help reduce the pollution.

A Prophet acts, inspires....

I want people to change the perception they have that ‘new technology’ equals pollution and destruction. A Hydrogen SUV will generate Oxygen and Water, we shouldn’t have any culpability to use it. Genetically modified rice brings vitamin to kids in Asia and save them.

This is why I designed a Pollution Index with the help of Mehran, a US guide, a brilliant scientist, to show the global effect on pollution of every article around us. This index will take into account every aspect of the production and distribution line and will show how articles compare regarding pollution. As an example, if a pack of carrots made industrially has an index of 100, biological carrots’ one will be 10 and genetically modified ones will be 3. It will be

clear for every one.

This index will protect the planet in a simple and clear way and at the same time promote the new technologies.

I am a facilitator for the future so that the fears of the future disappear by giving people clear evidences.

### **A NEW BOOK “PROUD TO BE RAE LIANS”**

Today is also the launch of the new book “Proud to be Raelians” made for French Speaking countries where it has become fashionable to be disrespectful to us. This is not acceptable and we will fight all the way through to be respected. We are doing so in Quebec where a judge can tell the media to stop discriminating a religious minority. It is in the Canadian constitution. The freedom of the Press doesn’t mean the right to diffamate.

This is what was recognized when Julius Streicher was condemned in Nuremberg on October 1st 1946. We should celebrate the day where a jour-

nalist has been condemned as indirectly responsible for the death of millions...

I want to thank all of you who testified in this book. You are my witnesses on Earth and you will influence like Michel Houellebecq's book influences. We will soon see the cameleon journalists who have spread garbages on us, say nice things about us. Let's look at them with amusement and give them love and compassion. They will be nice to us when the Elohim will arrive, but we will remind them of what they have done, with love and compassion. We must propagate love. Our actions in justice is an action of love. They need to be told to behave now so that they can still look at themselves in the mirror when the Elohim arrive. These people are in danger to despise themselves, we don't want that. We will push them to respect us so that they don't hate themselves later.

## **ABOUT ART**

---

I want to offer a seminar to the artists under the theme : " to develop one's creativity by deepening the link to the Infinite and the effects the perception of Infinite has on developing one's consciousness." I want to help artists to have more inspiration as art is inspiration and the basis is pleasure.

Our Creators created with scientists and artists. If creation had been done only by scientists it would be grey. Already artists on earth are using science for their creations. If Mozart could have a bird sing his creation he would abandon

his piano. To do living art, imagine.... You could have an idea, then there is a cube and your idea materializes and here it is flying around if it is a bird...

The Elohim are playing like children. A creator always wants to bring happiness. Art is at the heart of the Creation and every human being has a little bit of an artist in him, but we aren't all Mozart. It doesn't mean that you shouldn't practice if you're not a genius as by practicing an art, it will give you the capacity to appreciate their genius more.

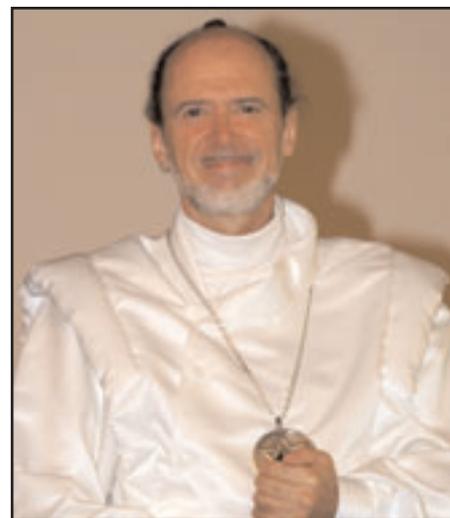

All arts are important but one has been neglected. Arts touch

every sense. Art for visual sense is one of the most developed, gastronomy one aswell, perfumes also. Each sense has its art, but the touch. Massage is an art.

Art is made to make people dream and elevate them. Massage art is quite complete as you combine music, odors and touch.

Let's be the "awakeners" and include massage as an art. Art is to make people dream and inspire.

## **THE FOUR PLANS**

---

I remind you it is fundamental to evaluate everything according to the four plans, the Infinite, the Elohim, the Society and the Individual. It is very important as when one plan is neglected, it leads to a mistake. When a plan dominates as well.

For example the terrorists have only one dominating plan, their god, the Infinite somehow. If one judges only referring to the Infinite plan, then nothing is important anymore. A fanatic can sacrifice everything like Abraham wanted to do with his son. In such a case, the individual doesn't count anymore and it is a mistake.

In a same way, if the society is the dominant plan, some people can be put in jail to preserve it and then come the Human dramas...

If an individual is privileged, then the society, the Elohim don't count anymore and it is a mistake.

As soon as a plan is eliminated, there is a problem. The 4 plans have the same level. The harmony is reached when all notes are at the same level.

## THE FUTURE

The majority of the people are anxious. There are so many horrible events described in the media. We are the only one to describe the beautiful future.

The Future is always more beautiful than the Past! Old people are saying the contrary but when they are sick they go to the hospital. It would be horrible to be reincarnated in the Middle Age, even 50 years ago... no computer, no cell phones, one TV channel...

The most advanced scientists agree with us and they describe the Singularity, the moment when computers will discover everything, in 2025!

Level 5 guides on stage having fun...

## TO BE GUIDES

To not do good is almost as bad as to make bad things. (Ne pas faire de bien est presque aussi grave que faire du mal.)

To be alive is to have the extraordinary capacity to use one's consciousness. A majority doesn't use it. We must be guides, all of us... We are saving genetic codes who could be desperate without the Messages.

Without hope, what's the point of living. The world can be a paradise after an extraordinary metamorphosis thanks to consciousness.

What's the main quality of a guide? ... His joy of life.

If you are not happy to be alive, it isn't worth existing. You should represent Yahwe with joy, spread the Messages with happiness, whether you are appreciated when you do it or not. Your best diffusion tool is your happiness.

You have all the good reasons to be happy. First in an egotistic way, because it is good for you. But also because in being happy, you can bring happiness to the others around you and give them the desire to

## NOMINATIONS

**Philippe Levieux** from France has been nominated level 4

**Mehran Sam** has been nominated level 5

**Michel Houellebecq** has been nominated Honorary Guide.

The Prophet RAEI awarded this honorary title to him for his last

novel, where he describes a religious movement inspired by the Raelian Movement even if mixed with fictions,

and where he envisions a future where human cloning and memory downloading give humanity eternal life through science, a prediction made by RAEI himself more than 30 years ago. Rael also declared : "Because of his integrity and his exemplary honesty for having said only respectful words about us in spite of the media pressuring him to say bad things about us, and the extraordinary media interest in us that he generated all over the world, I decided to name him Honorary Priest of the Raelian Movement".

Informed of his nomination by RAEI, the famous French author declared : "I am very happy and very proud of this nomination, especially because I am the first and only French citizen to be given this title."

The award will be given to Michel Houellebecq personally at a special ceremony to take place in the coming months.

know you better.

The true happiness is the happiness to exist.

We are vehicles of consciousness, of happiness.

In the middle of this century, Raelism will be the dominant religion on earth. Do not forget that. Houellebecq, the French philosopher, understood it. He said this philosophy is the most intelligent one.

You are the salt of the earth.

Look at our values : Love, awakening, removal of guilt, freedom of man, eternal life on earth... is there a better gift?

You are on earth to make people happy and conscious.

### **ABOUT HABITS**

There are habits that are good, the habits to be conscious. If your brain is automatically conscious, it is a good habit.

The habit to be amazed as well, the habit to love, all these are consciousness.

You can be permanently in a state of consciousness if you develop the automatism of consciousness, amazement and love...

Let's be unconsciously conscious and full of love?

I'm not talking about "the possibility of an Island" but of the "possibility of a consciousness"?

### **A SPECIAL MOMENT, THE DEDICATION OF A VINEYARD TO THE PROPHET RAEI**

On the bright sunshiny Saturday afternoon, all the participants went to a special ceremony, the dedication of a vineyard to the Prophet Rael. A few

representatives of the village were there too.

This vineyard has quite a story... 2 years ago, you may remember seeing pictures of the Prophet Rael in front of a huge stone erected on the vineyard by the owner Allan Tschopp, a local Raelian guide, a very active one! This stone shocked the local community which successfully used legal resources to have it down while the nearby cross was arrogantly overlooking the place without being questioned. Allan, determined to state his right to be respected for what he believes, decided to offer the vineyard to the Prophet Rael. No need to say that the celebration has been the talk of the Valley. But on that Saturday, it has been a wonderful subject of celebra-

tion... white wine, "mou" and grilled chestnuts were offered to the participants who shared a very special moment together in the most amazing surroundings. Thanks to Allan and his team for the hard work to make it happen!

Allan the revolutionary.

(below) The Honorary Guides were present in each section of the vineyard.

## A TESTIMONY....

What a wonderful few days we had. For me it was a celebration, a convention and a seminar all rolled into just 4 days of mind-blowing fun. The account of all the cumulated actions that the Raelian Movement has done made me realise how much we have achieved all together in the last 30 years. The review of global scientific progress bore home how mainstream science is finally beginning to catch up with the messages, meaning that society is getting ready to accept it soon. The descriptions of stem cell and gene therapy, of nanotechnology and future economic instability reinforced how close we are getting to a world of perfect health, plenty of food and no money as foreseen by our Beloved Prophet. The description of internet and a virtual world government made me realise how tangible is the untangible and how close to a political revolution we are. The review of the movement and its social context in the last 30 years combined with extrapolations into the future made us all realise how close we are to the golden age we have all been dreaming about. If the singularity point will happen at around the year 2025, which our Prophet told us is also about when the Elohim will arrive, then that means we have already gone past the half way stage to the building of the embassy. 20 years remaining is nothing, especially when we see how fast things are changing and how our efforts are making that change. The "Houellebecq effect" in France showed how the intelligentia can appreciate the message and all it takes is one or two of them to speak out honestly to turn the wind in our favour, and then we are really sailing! All this gives me such hope, fills me with such energy, like a long distance race, I want to give all the energy I have left for these last remaining laps. I think everyone present felt this and it was all very moving. Our prophet was brilliant as usual and the testimonies of Princess Loona and Jean Pierre made everyone cry when they described how they met, discussed and shook up the French, Swiss and Belgian governmental ministers and got them to commit to examining our dossiers concerning discrimination against minorities. We all identified with the David versus Goliath concept of how a naïve Raelian, armed only with purity and conviction, can jump into the lions den and tackle the political wolves head on. "Yes" she said without thinking, and despite the hurdles, yes they did it. To me, that represented each one of us who said yes to the Elohim and without any particular experience took on an unknown task and finally excelled in it. To me it represents Our Prophet's yes, and the movement taking on the world and succeeding.

*Marcus, level 5*

## SHOWS

It was so short, but still, our artists had the time to organize 2 shows... so good!!!

Some non-Raelians came also to offer their arts as a tribute to the Prophet Rael. One of them is a famous German band portraying robots driven by a game boy toy.... Fascinating!

The Raelian artists were also amazing.... And RAEL's new song was a definite hit...

Dou was with us as well and electrified the room ?.... Thank you all for the pleasure you gave us!!!

## **ACKNOWLEDGMENTS**

A Raelian Convention, it is also tens of benevolent taking care of every aspect of it. It was all orchestrated by Benoit Aymonier under the guidance and vision of Pierre Gary.... Thanks to both of you and your teams!! We owe you a big part of our pleasure!

Next year, a Science day will be organized to gather all the scientists who want to demystify the Future, all those who are fed up to be listened to, only 30 years after they made their invention!!! More info soon.

You will be able to see images of the Convention in a few days online on Raelianews.org. Already now, check it out, we have posted a video reporting the Summer seminars. Sophie also agreed to have a video of one of her amazing dances posted on the site. You can download it in the video section of Raelianews.org as well. Enjoy!

Pierre Gary on the Left.

A happy continental guide after a successful convention.  
Bravo Gerard!

Italians responsible for partying! ;-)

Benoit, Charles and Jean-Francois Aymonier
